Assets

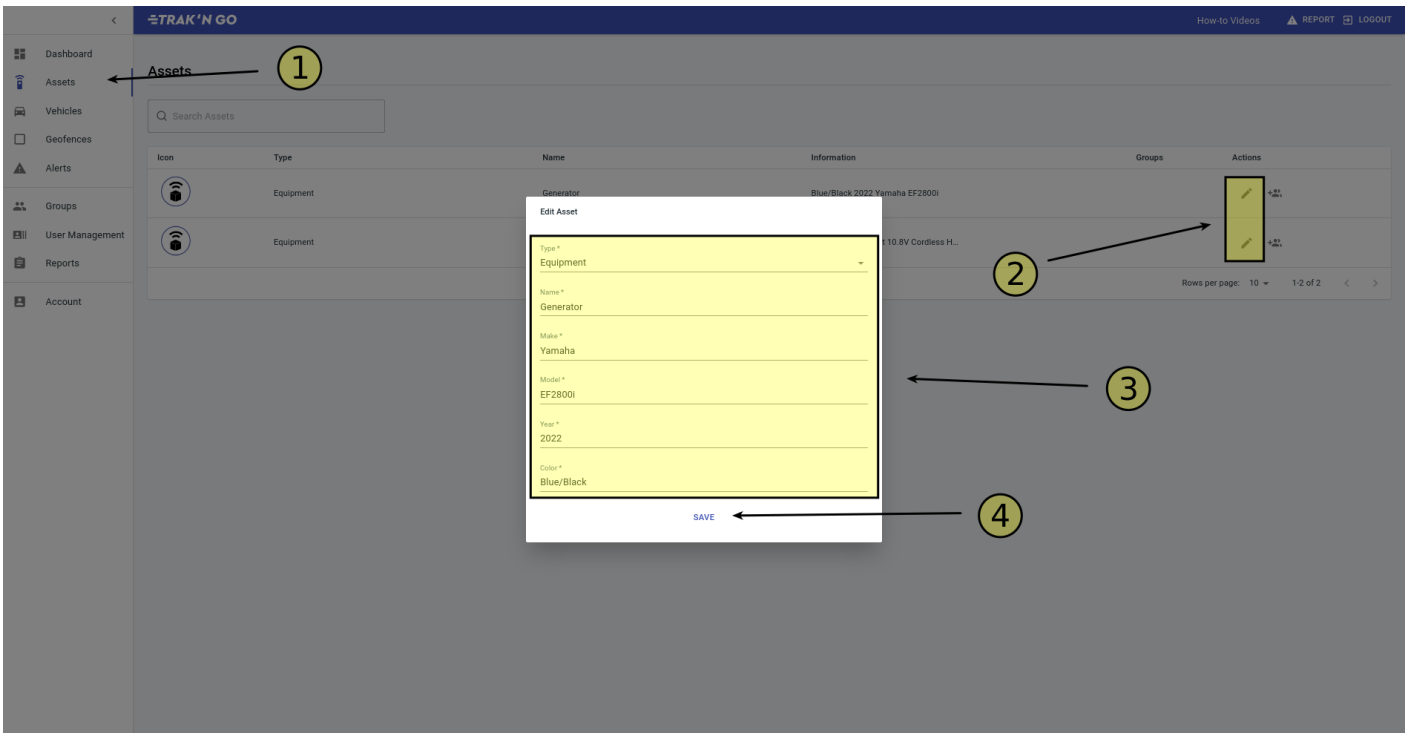
- What are assets?
- How to edit an asset's information?
- How to add an asset to a group?

What are assets?

Assets are things tracked via beacons as opposed to trackers. Beacons are much smaller than a tracker and require no external power. Example of items that you would want to use a beacon on are generators, ladders, toolboxes, etc.

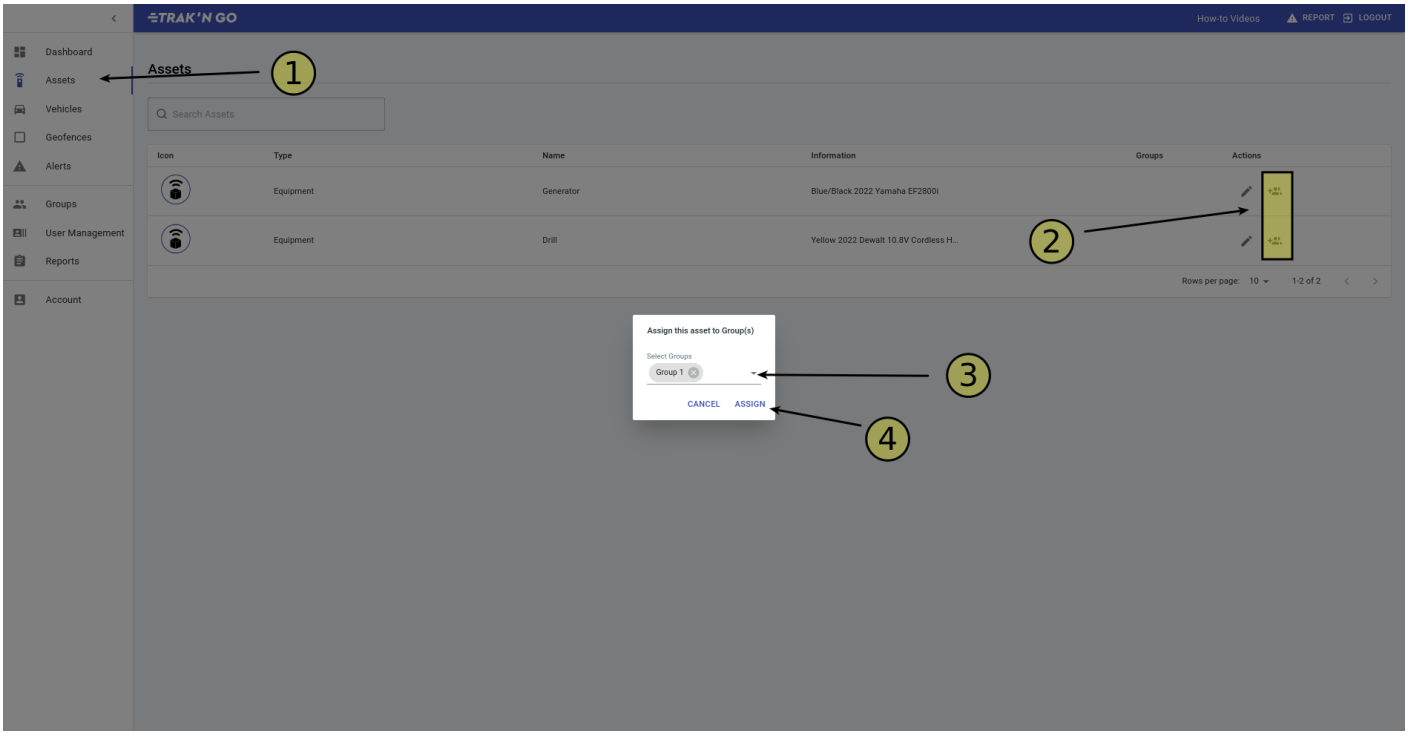
Beacon uses Bluetooth to communicate with a tracker. A scenario where assets are best utilised is say you have multiple job sites and have vehicles that are tracked via trakngo. If an asset goes missing, you can use trakngo to look up which vehicle took that asset and to which job site.

How to edit an asset's information?



1. Make sure you on the Assets page.
2. Click the pencil icon on the asset you want to edit.
3. Make the desired changes.
4. Click SAVE to make the changes.

How to add an asset to a group?



1. Make sure you on the Assets page.
2. Click the indicated icon for the asset you want to add to a group.
3. Select the groups that you want to add the asset to.
4. Click ASSIGN to make the changes.
